ITS TIME TO TEASE OUR BRAINS..!!!

- A family lives in a large tower apartment building, 10 floors high. Every day their son takes the elevator from the family's apartment on the 10th floor to the ground floor and goes to school. When he returns in the afternoon, he uses the elevator to get to the fifth floor, and then uses the stairs for the remaining five floors. Why?
- Because he cannot reach the buttons higher than five.
