Extension Activity

Seed Balls Preparation

Date: 26.06.2019

A group of 50, III B.Sc. Chemistry students participated in the extension activity conducted by Sri GVG Visalakshi College for Women. The overall aim of the activity is to increasing green cover across the country. The Seed Ball programme create environmental conservation and to fight against its degeneration by involving the youth communities. In this regard our students prepared golf ball-sized mixture of soil, seeds and compost. Seed ball is a quicker and cost-effective method to reclaim the lost green cover of our environment. Make balls of seeds that are both fun to throw and an easy way to grow native trees. The active participation of our students resulted in the preparation of more than 2000 seed balls. This activity gives another dimension to higher education system and orient the students to save our mother earth.
