Department of Mathematics

Education Field Trip - Bangalore

Date: 07.02.2024 & 08.02.2024

Department of Mathematics arranged a field trip for mathematics students to Bangalore for two days. First day we took the students to Hindustan Aeronautics Limited (HAL). It is an Indian public sector aerospace and defence company, headquartered in Bangalore. It is one of the oldest and largest aerospace and defence manufacturers in the world. HAL is managed by a board of directors appointed by the president of India through the ministry of defence, Government of India. It makes sure that the visitors get the possible insight into the aeronautical history of HAL and of India, its experiments. It was a nice experience to the students. They learnt many new ideas from there.

On second day, we took students to Viswesaraya Museum, Bangalore. This splendid museum dedicated to the memory of Bharat Ratna M. Viswesaraya. A fantastic series of images created by planetary data of high resolution satellite images, animated images of atmospheric show fluctuations in ocean currents were seen. The infrastructure & the appearance was very impressive. The students gained more scientific information there.
