Webinar on

"Machine Learning Use Cases and its applications"

“Machine Learning Use Cases and its applications”

Department of Information Technology organizes Webinar on "**Machine Learning Use Cases and its applications** " was organized on 25 th May 2022. The webinar focused on Data science in industries, the Importance of machine learning and deep learning, the Difference between artificial intelligence/ machine learning/ deep learning, etc.

There were more than 80 attendees present from department of information technology. One of the reasons for this massive response was because machine learning has an amazing Future and is very interesting for young students. The Webinar was conducted through google meet.

Resource Person:

Ms.B.Kiruba
Assistant Professor
Department of Artificial Intelligence and Data Science
Sri Krishna College of Engineering and Technology.

Resource person spoke about the importance of Machine learning and Artificial Intelligence and also shared her thought about Machine learning and data science from the perceptive of an industry expert. ”Data is the **New Oil** which is one of the most valuable resources in the world”. She also spoke about the different types of machine learning and gave various real-life examples too. she further spoke about the applications of Data Science and Machine learning in the industries such as financial services, transportation, telecommunication, etc. Later on, there was a Q&A session where resource person answered many questions of the students.
