**EXTENSION ACTIVITY**

**REPORT 2019-2020**

**Venue :** Rajalakshmi Gengusamy Matriculation Higher Secondary School, Udumalpet

**Date :** 26.06.2019

Under Extension activity, our department has conducted the extension activity program on **SEED BALL PREPARATION** for III year students, to provide the ancient technique for propagating plants from seeds without opening up soil with cultivation tools such as a plow. The basic need of the seed ball preparation programme is to motivate the students to protect the environment by increasing tree cover. The program is part of the institution's aim to plant a maximum number of saplings in the district. The balls will be made with seeds of fruit-yielding plants mixed with soil, dung, and cow urine. The seeds chosen will be of those trees which are known to grow in the local area. These seed balls will later be thrown or sown under the soil during the monsoon so that they can grow into trees. Around **2080** seed balls were prepared by our students in 2 Hours.
