11.30 a.m. – 12.30 p.m. – II Batch

Objective of the Programme

Disposal of feminine hygienic product is a daunting challenge, one that causes health and environmental hazards. Annually, 12 billion sanitary napkins are used in India, of which 98% ends up in water bodies and landfills. It takes 800 years for a single sanitary napkin to decompose.

This Programme aims to train the students to develop skills to make ecofriendly biocompostable hygienic products and to make the students Green Entrepreneurs.

The theme for World Health Day is “Our Planet – Our Health”. On this day, let us pledge to be a Green Consumer by choosing sustainable menstrual hygiene products for the sake of our environment.
