DEPARTMENT OF MATHEMATICS
Invited Lecture on "Viewing Beauty of Mathematics in Euler's Identity & More"
14.09.2017

Report

Department of Mathematics has organized a Guest Lecture on "**Viewing Beauty of Mathematics in Euler's Identity & More**" to Mathematics students. **Dr.K.S.Vidhya**, Senior Research Fellow, IIT, Palghat was the resource person and 175 of our students were benefited and enriched their knowledge.

Title: Viewing Beauty of Mathematics in Euler's identity and more

Date: 14.09.2017

Feed back

The guest lecture was given by K.S.Vidhya on the topic Beauty of Mathematics in Euler's identity was very useful to us. She explains more about π and Euler's constant. Friendly interactions with the students is very helpful to ask more questions about subject

This useful guest lecture was given by K.S vidhya Mam. about the euler's identity and mathematics beauty. From our school days we slightly known the euler's methods and more. So, we easily understood the lecture concepts. She was very friendly and easy going towards the students and we got more knowledge about the lecture topic

The guest lecture was given by X.S. Vidhya on the topic Beauty of Mathematics was very useful to us. The lecture was interesting to listen. In the guest lecture we understood more about Mathematics. The Euler's constant and about history of π. And it was more interesting because many interactions was there in the guest lecture. We also gained more knowledge.

The guest lecture was given by K.S. Vidhya on the topic Beauty of Mathematics was very useful to us. We understood the intersecting facts in Mathematics. She explains more about exponertials. She discussed more about Euler constants. She derived the value of π. She interact as a friend with the students, so we gain more knowledge about the subject.

the guest lecture was given by K.S. Vidhya
on the topic Beauty of mathematics was very
useful to us. In the guest lecture we
understand the more facts in mathematics.
K.S. Vidhya mam explains more about the
Euler's constant and explained about the
history of π. so the guest lecture was
very interesting and there was more
interactions in the guest lecture so we
can able to know about the subject
knowledge.
